Double ear, remote PTT, right or left

Single ear,  
Integrated PTT, right or left

Double ear,  
Integrated PTT, right or left

# COMPAGNON SRX

The **COMPAGNON SRX** is designed to accommodate a **MOTOROLA** like **SRX 2200** or **APX 6000**. It is a waterproof up to 20 meters (IP69-20), ruggedized, and specially developed for subaquatic use.

The long wire antenna can be positioned on the tactical vest, mask strap, or on the telescopic pole. The short antenna allows for transmission of information in calm surface conditions.

The performance of the offered equipment allows for communication up to 10 km.

Specially designed to deliver high-quality sound, the passive headgear is available in several versions, including mono or double earpieces (with integrated or remote PTT). The design is optimized for comfort and to reduce the constraints associated with extended wear.
